PROFESSIONAL EXPERIENCE

Updox, Columbus, OH — *QA Engineer*

Updox is a series B private equity funded healthcare IT SaaS startup. Updox serves more than 300K users and 72mm patients.

AUGUST 2016 - PRESENT

My daily activities include: creating automated test cases using Ruby, Cucumber/Gherkin, regression suite maintenance, continuous integration testing, software integration testing, and release coordination. Offers strong debugging skills. Experience with complex databases/relations. Hands on contributor in Agile environment, testing applications and systems to support business needs.

Ansys, Inc., Pittsburgh, PA — *Software QA Co-Op*

Ansys is a \$988mm public company that develops engineering simulation software.

SEPTEMBER 2013 - JANUARY 2016

Conducted automated and manual testing on Windows and Linux platforms. Managed test labs of 50+ computers of various operating systems. Worked on an Agile Scrum team, used Rally (Agile PM tool) to manage projects. Executed regression testing. Supported test lab when needed. Obtained software and hardware certifications for Ansys software during 4 co-op rotations.
